

# Pre School Head Start Kit

Around the county, public and private non-profit agencies promote Head Start programs for the young children in their care. These programs provide comprehensive child development services to economically disadvantaged children and families, with a special focus on helping preschoolers develop the early reading and math skills they need to be successful in school. The varied experiences provided by these programs support the children's growth and development, which includes their physical, social, emotional, and cognitive development.

With the program in mind, Kits for Kidz has developed an assembled *Head Start Kit* that will give these preschoolers some basic tools they can use to develop these needed skills. Each kit comes packed inside of a sturdy 16" backpack. All backpacks have adjustable straps, multiple pockets and a padded handle. The backpack assortment includes equal amount of boys & girls styles to ensure a successful distribution.

All components included were chosen with the Head Start mission of cognitive development in mind. The kits are stocked so we can ship the product immediately and the product is delivered to your choice of destination, ready for distribution.

Here is what each kit contains:
